SKILLS

Languages: Python, Java, JavaScript

Databases: MySQL

ML: TensorFlow, Scikit-learn, Pandas, NumPy

Big Data: Big Data concepts, PySpark, Hadoop(HDFS)

Web Technologies: HTML, CSS

Web3 Technologies: Blockchain Basics, Ethereum, NFTs, Solidity

PROJECTS

Mental Health AI Assistant

- Designed and developed an AI-powered mental wellness platform featuring mood tracking, meditation guides, and a chatbot for personalised emotional support, improving user engagement through intelligent recommendations.

Hospital Management System

- Developed and deployed a hospital management application providing CRUD operations on patient, doctor, and appointment records, using JDBC and MySQL, to handle data in real time.

Yoga organization website

- Developed a responsive website for the Patanjali Yoga Organization, showing yoga sessions, trainer profiles, and contact forms with a clean, user-friendly, and modern design.

Decentralized To-do list Dapp

- Engineered a full-stack decentralized task-tracking application using Solidity, enabling secure on-chain storage of tasks and seamless interaction with the blockchain wallet.
